

are known to be capable of interacting with cucurbitul or its derivative of formula 2.

Thus, it is obvious to a person of ordinary skill in the art that all substituents represented by X1, X2, Y1, Y2, R4, and R5 can be introduced to form a compound represented by formula 1. Thus, all substituents represented by X1, X2, Y1, Y2, R4, and R5 are not functionally distinguished. Therefore, claims 1-3 are not deemed to lack unity of invention.

Early and favorable action on the merits of this application is respectfully requested.

Respectfully submitted,

By
